

Heuristics Evaluation

This heuristics evaluation is based on certain usability heuristics for user interface provided by Jakob Nielsen. For every criterion, please rate the statement from 1 to 5, where 1 means you strongly disagree with the statement, and 5 means you strongly agree with the statement.

At any point in the application, I am given clear visual indication of what is going on in the system.

Rating: 1 2 3 4 5

Comments:

When using the application, adding a person of interest is intuitive and clear to me, and when I try locating someone, the directions are intuitive and match what I would do in the real world.

Rating: 1 2 3 4 5

Comments:

At any point in the application, if I made a mistake, it's easy to backtrack to a previous point and try another option.

Rating: 1 2 3 4 5

Comments:

The vocabulary and visual language used in the application is clear and consistent.

Rating: 1 2 3 4 5

Comments:

At any point in the application, everything I need to know about the current state of the application is shown to me.

Rating: 1 2 3 4 5

Comments:

The design of the application is simple and clear of any information or details that are not useful.

Rating: 1 2 3 4 5
